GR 99 P 3326

Abstract

Insulation displacement contact, and a connecting terminal

An insulation displacement contact, for example for terminal strips, which ^{includes} has a slotted, sprung contact region as a contact-making slot ~~22~~ on a connecting bracket ~~11~~, which contact region is surrounded and reinforced by an outer spring slip ~~23~~. The ~~invention~~ provides that the spring clip ~~23~~ is designed to form an insulation displacement blade ~~24~~ in at least one end region.

Figure 1

cutting blade on the end region forms an entry region
which is capable of cutting, and is located in front of
the contact region.

7. (Amended) A connecting terminal having at least one
5 insulation displacement contact as claimed in one of
claims 1 to 7, claim 1

8. (Amended) A terminal strip having at least one insulation
displacement contact as claimed in one of claims 1 to
7, claim 1
